Files can be downloaded from any computer from our high speed servers. Our service is completely free for everyone. If only we could, we surely would! On the other hand, using file can actually save you money. Keep your files private, or send your download links only to friends or family. The cost of that data transfer is covered by your internet service or the data plan on your phone. We have no file size limit. Alternatively you can choose to share your download links on blogs, forums and social networking sites. Your wallet will be none-the-lighter! You can upload any type of file (movies, music, documents, images, zip files and more). Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. No account or credit card is required to get started. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. You can give this download link to your friends by mail or instant messenger. filehosting provides an easy possibility for you to send large files to your friends. So try our free and simple filehosting service now. It is also allowed to link to the download page from websites and communities. You decide who you want to share your files with.
