Sign in Anonymous 4 years ago For the best answers, search on this site The substantive material is largely the same, but the exercises are different or at least changed around. Textbook publishers do this to sell more new books and end sales of used books. Going from the 9th edition to the 10th edition, they split chapter 9 from the 9th edition into six separate chapters 914 with mostly the same material as before. The 7th edition is pretty old, so you'd probably be better off with the new version. This software was always included on CD through the 9th edition, but starting with the 10th edition it is sold separately or accessible online using a code. If you're taking a class using this text, be sure to get this software. Even if you don't read the book, at least use the software. I've seen ebooks of the 9th edition, and also the Learning Logic 5 software, but the 10th edition electronic version is only temporarily licensed for 6 months by subscription through a new system in an odd proprietary ebook format with special reader software. The 10th edition electronic edition is probably distributed in this way for the DRM features and, again, to end the sale or distribution of used copies. 0 0 Thomasena 5 years ago ED is a treatable condition.
