heated ceramic glass surface All cleaning agents must be removed with adequate amounts of clean water after cleaning because they can have a caustic effect when the surface becomes hot. Do not use any aggressive cleaners such as grill or oven sprays, scouring pads or abrasive pan cleaners. Clean the ceramic glass surface after each use when it is still warm to the touch. Page 23 Cleaning and Care Continued Problem Dirt 1. Remove burnt sugar, melted plastic, aluminium foil or other materials with a glass scraper immediately and while still hot. EN Important There is a risk of burning yourself when the glass scraper is used on a hot cooking zone 2. Clean the hob as normal when it has cooled down. If the cooking zone on which something has melted has been allowed to cool, warm it up again for cleaning. Page 24 Warranty and Service EN FAQs and troubleshooting A fault may result from a minor error that you can correct yourself with the help of the following instructions. Do not attempt any further repairs if the following instructions do not help in each specific case. Warning Repairs to the appliance are to be performed only by a qualified service technician. Improperly effected repairs may result in considerable risk to the user. If your appliance needs repair, please contact your customer service centre. If you select a low heat setting, the heat will cycle on and off more frequently than at higher settings. The heat also cycles on and off at the highest setting. Ask your question here. Provide a clear and comprehensive description of the issue and your question. Installation and Operating Instructions. To avoid the risk of accidents or damage to the hob, read all instructions before installing or using the appliance. Contents. Using This Manual. 24EN Please take the time to read this owners manual, paying particular attention to the safety information contained in the following section, before using your appliance. The following symbols are used in the text. If the Hob is overheated because of abnormal operation, And the Hob will be switched off. Other reasons why a cooking zone will switch itself off. All cooking zones will immediately switch themselves off if liquid boils over and lands on the control panel. The automatic shutoff will also be activated if you place a damp cloth on the control panel. In both of these instances, the appliance will need to be switched on again using the main power sensor after the liquid or the cloth has been removed. Residual heat indicator. Even after the cooking zone has been switched off, the residual heat indicator goes out only after the cooking zone has cooled. Important As long as the residual heat indicator is illuminated, there is a risk of burns.

<http://precisionheavyhaul.com/images/braun-deluxe-juice-extractor-manual.pdf>

Important If the power supply is interrupted, the symbol will go out and information about residual heat will no longer be available. This can be avoided by always taking care when near the hob. Initial cleaning. Wipe the ceramic glass surface with a damp cloth and ceramic cooktop glass cleaner. EN. Hob Use. Using suitable cookware. Energy saving tips. You can save valuable energy by observing the following points. Right! Wrong! Using the touch control sensors. To operate the touch control sensors, touch the desired panel with the tip of your pointed finger until the relevant displays illuminate or go out, or until the desired function is activated. Ensure that you are touching only one sensor panel when operating the appliance. If your finger is too flat on the panel, an adjacent sensor may be actuated as well. Switching the appliance on. I like the lock feature which is a definite plus with a young grandchild in the house. Easy to use. I no longer I will recommend this hob Super value for money, would highly recommend. Because we match the prices of competitors, there is the potential for prices to drop further. We will always offer our customers our price match promise. See terms and conditions. NewDay Ltd and AO Retail Limited are each authorised and regulated by the Financial Conduct Authority. Credit is available only to UK residents aged 18 and over. Subject to status. Terms apply. Now you'll get all our best deals sent straight to your inbox. Looks great and is really simple to use. I like the lock feature which is a definite plus with a young grandchild in the house. Easy to use. I no longer I will recommend this hob Super value for money, would highly recommend. Really good price compared to nearly identical products! NewDay Ltd and AO Retail Limited are each authorised and regulated by the Financial Conduct Authority. If this second link doesn't work, follow the directions below to reach this page. Samsung has the Users Guide for the oven on the Support tab, see The manual for the cooking hob can I hope this helps. Cindy Wells Under the 2nd and 5th knobs is an extra screw which holds on the front cover. Unscrew these and free the cover then access is gained to the screws 2 on each edge which removes the plate to which the regulators are fixed. Remove the faulty regulator by unscrewing it from the plate, 2 screws It is an easy job then to install the new part taking care to put the correct wires on the correct terminals. Reassemble, job done! I don't know how I've managed to do this as well Anyway it says Cancelling the key lock After switching ON the control the child safety feature can be deactivated. Here it is necessary to simultaneously operate the front right cooking zone select key and the MINUS key and then operate the MINUS key alone.

[www.crossroadscounselingcenters.com/ckfinder/userfiles/files/canon-imagerunner-5020-manual.pdf](http://www.crossroadscounselingcenters.com/ckfinder/userfiles/files/canon-imagerunner-5020-manual.pdf)

If all steps have been carried out in the right order within 10 seconds the key lock gets cancelled and the control is OFF. Otherwise the input will be considered incomplete, the control remains locked and switches OFF after 20 seconds. It's been like it for about 6 months and we're still able to get it going eventually. Login to post Its all four rings. When on high, there is a click and hob dims as if I have changed temperature to low. Its a Samsung model bf641fst. How much is this to replace. And is there a warranty. Even if it's my fault There are a few reasons why the sensor could be saying its been on for too long All of these can be fixed by turning the hob power off at the wall, then back on again. Its all four rings. When on high, there is a click and hob dims as if I have changed temperature to low. Answer questions, earn points and help others.
